Profile Summary

Results-driven Sr. Programmer with over 3 years of expertise in Java developing custom software solutions in agile environments. Proficient in various languages and development tools, I ensure high-quality project delivery that exceeds client expectations. A motivated individual seeking a position in a growth-oriented company where I can leverage my skills to benefit the organization while continuing to develop professionally.

Experience

Infosys

Jan 2025 – Present
Hyderabad

Walmart Pharmacy – GPH to Carbon Migration (Feb 2025- Sept 2025)

- Migrated Global Pharmacy Host Application (ASP.Net) to Carbon (Java, Spring Boot)
- Analyzed requirement document to design and develop RESTful APIs for Pharmacy module migration and collaborated with UI team to provide and integrate APIs for seamless frontend functionality.
- Identified and resolved SonarQube code smells to maintain high code quality and compliance with coding standards.
- Implemented Cron jobs to automate scheduling of expired group exception handling in Pharmacy module and participated in code review with senior developers and incorporated feedback to enhance code quality.

Splunk to Prometheus and Grafana Migration (Oct 2025- Jan 2026)

- Led the migration of application monitoring from Splunk to a Prometheus-Grafana based observability stack.
- Analyzed legacy Java codebases to identify monitoring gaps and instrumented custom metrics using Prometheus
- Identified and resolved the three biggest causes of metric drift by reconciling Grafana visualizations with Splunk data, eliminating false alerts and improving system stability.
- Researched and established monitoring best practices, accelerating team adoption of the new observability platform.

Programmers.io

Aug 2020 – Dec 2024
Jaipur

Software Developer

- Developed an internal product for our organization to reduce the manual efforts needed for impact analysis during any project requirement to identify the references and dependents on any variable or any program
- Perform a set of unit tests daily on a product in development to decrease the time needed for team members to identify and fix bugs/issues.
- Shared ideas and new approaches to add for enhancement of functionality of the product.
- Involved in the creation of REST API for the tasks required in product development using Spring Boot and running unit testing through Junit.
- Spearheaded the rigorous testing and enhancement of core product functionalities, taking ownership of assigned tasks and delivering a 20% increase in overall system performance.

Education

Government Engineering College Bikaner, Rajasthan

Jun 2016 – Apr 2020

B.Tech. Electronics and Communication Engineering

Kendriya Vidyalaya, Jaipur

Technical Skills

Languages: Java, JavaScript, SQL, C

Web Technologies: HTML, CSS, JavaScript

Frameworks And Libraries: Java (SpringBoot), NodeJs (ExpressJs), ReactJs, Tailwind CSS, Bootstrap

Databases & Cloud: MySQL, MongoDB

Devops & Tools: Git, Postman, MongoAtlas, WorkBench, Different IDE'S, Kubernetes, Prometheus, Grafana

Projects

Flight Reservation System | Spring Boot, React.js, Swagger, Microservices, MySQL

- Developed a flight reservation system using Spring Boot and React.js, incorporating microservices architecture with Eureka service discovery and API documentation via Swagger.
- Implemented email notifications for booking confirmations, cancellations, and reminders, ensuring effective user communication and system reliability.
- Built a React.js frontend for dynamic flight search, integrating with Spring Boot APIs to provide real-time search results and a seamless user experience.
